October 4, 1983

Dear Jim,

I have written in the margins of the questions that were and were not asked in our last conversation. This afternoon, after rereading the tape of last Friday, more came to mind which will be in this letter at the end. Am also enclosing a few more pages out of a book on Isaiah, Revelation, etc. Will send John of Avila the next time I snitch the book.

Hopefully, this dialogue is not driving you crazy. What we all hope is that we can make it easier for each other, so please let me know when things don't work well for you. With all my questions anyone would probably get nuts but the learning process is interesting and fun on this end. Maybe after you've had time to digest the latest we should make an appointment just to talk about these - might take a year or two. So, here goes:

All questions refer, I think, to conversation of 9/30/83

p. 2 - Astral karma - can it be dealt with on both planes or is it something that's only astral. Do we only deal with physical karma here or is it something we can take care of either place? Is it interchangeable? For instance, when you travel astrally, do you deal with karma then? Or is it basically just learning?

p. 4 - "master would even incarnate" - Did Masters ever have to go through the evolutionary process or were they always around? In rereading this question and remembering some down the line, many are probably answerable together.

p. 6 - Dalai Lama - Is this really evolution of the soul if he keeps coming back to do the same thing over and over?

pp. 7-8 - We all came from Sirius as a group. What were we there? Blinking stars, as one of our number has suggested, a group energy, or what? Why did we come here - chosen, sent, or decided or other?

Where is Charon Singh?

Who are the other embodiments of God on Earth now? Is it usual to have 3 or 4 - say for different parts of the world?

p. 10 - you say "a Master will tell you..." *in 4 lives -* - You said you had a living Master when we spoke in July - is yours a living Saint - embodiment of God?

p. 10 - Where, or what system did the 144,000 come from - Sirius? Are there still only 144,000 here or did they multiply? Universal spiritual kingdom - how did the people (souls) get there in the beginning - were they always there? Never fell? Or what?

PP. 10-11 - If Jesus was Moses, was or is he also Charon Singh and all other living saints? Are there lots of different embodiments of God or only one? Does 3 or 4 at a time mean overlapping souls? If guides are in most instances expressions of past lives and if Isaiah, Jesus and Charon Singh came to your desk dedication, are you not also a living saint? People that meditate and see Jesus as a guide - are they not too a part of that expression? Is the final answer that everyone everywhere is a living embodiment of God - the difference being that some are more aware to certain aspects of this than others?

**WHAT ARE THE DIFFERENT ASPECTS OF GOD?**

I realize that if I am even close that this is an incredible oversimplifi

cation of this. Would you care to expand upon this and correct me?

p. 12 - There were 4 - now only you - no real output to incarnate again therefore most of the energy is being put here. Where is the rest of your energy?

p. 14 - How many parts of the soul are there? Expressing what?

p. 16 - Tibet - monk-priest. Were you the Dalai Lama?

And now for the most bizarre question of the day - The star Sirius and the word serious - any connection?

And now I'll reiterate a question that I expanded upon in the first set - Since you've had to put up with me and be patient so many times, don't you sometimes wonder where it will all end? I would if I were you. Are you also learning as you teach? Since we all come back so often together - do we all owe each other or can we better function together doing what we have come to do? Have you ever noticed that sometimes the questions make the full circle and come back to the very beginning - oh well. I love you and thank you for your patience.

Much love,  
Y  
Kaye
